The image shows a sign-up form for Heroku. On the left, there are three sections: 'Free account' (Create apps, connect databases and add-on services, and collaborate on your apps, for free.), 'Your app platform' (A platform for apps, with app management & instant scaling, for development and production.), and 'Deploy now' (Go from code to running app in minutes. Deploy, scale, and deliver your app to the world.). On the right, there is a form with the following fields: 'First name *' (David), 'Last name *' (ROUMANET), 'Email address *' (golffy@free.fr), 'Company name' (empty), 'Role *' (Hobbyist), 'Country *' (France), and 'Primary development language *' (Node.js). A dropdown menu is open for the 'Primary development language' field, showing options: Ruby, PHP, Python, Node.js (highlighted), Java, Clojure, Scala, Go, I use another language, and I'm not a developer. At the bottom of the form, there is a link to the Terms of Service and Privacy Policy.

Heroku appartient et utilise la même politique de protection des données que la société Salesforce. Les données personnelles sont utilisées par des partenaires et sont transférées aux États-Unis : en clair, ce n'est pas RGPD.

— International transfer of Personal Data

Your Personal Data may be collected, transferred to and stored by us in the United States and by our affiliates and third parties (as disclosed in the full Privacy Statement) in other countries. Therefore, your Personal Data may be processed outside your jurisdiction, including in countries and jurisdictions that may not provide the same level of protection. As described in the "International transfer of Personal Data" section of our full Privacy Statement, we have implemented safeguards to ensure an adequate level of data protection where your Personal Data is transferred outside of your country or jurisdiction.

Installation du CLI Heroku

Quel que soit votre projet, vous devrez installer localement le CLI de Heroku (sur votre machine) :

In this step you'll install the Heroku Command Line Interface (CLI). You use the CLI to manage and scale your applications, provision add-ons, view your application logs, and run your application locally.

Download and run the installer for your platform:

 **macOS**

[Download the installer](#)

Also available via Homebrew:

```
$ brew install heroku/brew/heroku
```

 **Windows**

Download the appropriate installer for your Windows installation:

[64-bit installer](#)

[32-bit installer](#)

 **Ubuntu 16+**

Run the following from your terminal:

```
$ sudo snap install heroku --classic
```

Snap is available on other Linux OS's as well.
